

## PRESS RELEASE

### Saphoros Spa Essentials Launches with New Signature Skin Care Line

March 2, 2006

FOR IMMEDIATE RELEASE (Texarkana, TEXAS) – Saphoros Spa Essentials has debuted with its new signature collection of skin care and mineral makeup products. The debut of the Saphoros Spa Essentials line is a very exciting event for the new online business, which predicts a very positive response to its collection of natural products. “Consumers want a more natural approach to skin care and anti-aging – free of artificial color and perfume,” explains Donna Standridge, owner/founder of Saphoros. “We’ve teamed up with one of the most reputable dermatological labs in North America to provide that. Our formulations rely on special extracted botanical ingredients to deliver results.”

One application of the delightful Tension Relief Balm confirms the aromatic advantages of Saphoros’ approach. The essential oil blends used in their products produce a relaxing and calmative effect on the user. For example, the Tension Relief Balm features feverfew, traditionally used in herbal medicine for easing migraines, rosemary and peppermint to improve circulation, and a host of botanical extracts and nutrients to soothe the mind and body. You’ll find the same natural and aromatic benefits in all of their products. Saphoros’ anti-aging formulations contain the most effective ingredients known today, such as their Copper Peptide/CoQ10 Gel, DNA Skin Repair, and Alpha Lipoic Acid Lifting Serum. Saphoros offers total skin care for every skin type.

In addition to the Spa Essentials line, the company will carry signature bath & body and mineral makeup lines. For more information, visit the company’s website at [www.saphoros.com](http://www.saphoros.com), or contact by e-mail at [marketing@saphoros.com](mailto:marketing@saphoros.com).
