

Product Sheet Duality Eye Shadows

Duality Shadows are multi-tonal colors with definite split personalities... Each shadow displays a distinct personality with each application method. Wet foil for a glowing, metallic base and staying power like you wouldn't believe. Use a sponge-tip to get both the metallic base and the shimmering highlights. Use a dry shadow brush to get the lighter aspect, with a little less metallic and more highlights and glitz.

Don't let the color in the jar fool you... They're veritable chameleons when they hit your skin. Each shade is surprisingly different!
